Highlight of Qualifications

Recent graduate in Audio and Music Technology at the University of the West of England (UWE Bristol), seeking a role in an audio team with a strong teamworking and training ethic, to develop and contribute existing skills in audio software development.

- Special focus in C++/C (JUCE), DSP, Unity/C#, FMOD, MaxMSP, has built experience building audio tools and systems for interactive and embedded-style environments.
- Skilled in real-time audio processing, synthesis, and effects-based workflows across game audio, immersive media, and live sound, applying DSP fundamentals such as filtering and spectral manipulation. Developing skills in FFT.
- Excellent collaboration, organisation and problem-solving skills, including working in Agile environments, using technical documentation, Microsoft Office/365, Discord, Zoom.
- Demonstrated skill in audio engineering, including Pro Tools, Reaper, Logic, Studio One, MuseScore, Fender Studio.
- Additional interests include performing electric guitar (Rockschool Grade 7+), 5-string bass guitar, synthesisers, drum machines, samplers, and jazz piano (Grade 1).

Education

University of the West of England | Bristol, UK

BSc (Hons) Audio and Music Technology *September 2022 - August 2025*

- Relevant coursework included Audio Post-Production, Audio for Games, Architectural Acoustics and Advanced Technologies.
- Key achievements included developing bespoke audio/AV software and plugins using C++ (JUCE), Three.JS, and C#, integrating DSP and synthesis.
- Audio software experience included hands-on use of industry technologies such as Pro Tools, Reaper, Unity, FMOD, and MaxMSP.
- UI design work included creating textures and materials for 3D models in Blender for a virtual gramophone audio plugin GUI.
- Film/TV and game sound work included engineering complex soundscapes for film and games, including a full redesign of a Chernobyl HBO series trial scene, utilising 5.1.4/7.1.2 surround sound, audio/dialogue editing, and foley recording; achieved a 2:1 grade, personally making this an outstanding achievement.
- Microelectronics work included building custom microelectronic devices to manipulate audio parameters of software synthesisers, samplers and drum machines in real-time within MaxMSP.
- Used VR development and spatial audio techniques to create fully immersive experiences, blending music composition with SFX and atmospheric layers.
- Applied advanced music theory and proficiency in guitar, bass, and synthesisers to compose original scores using Logic, MuseScore, and Fender Studio (formerly PreSonus Studio One).
- Prototyped an immersive VR Digital Audio Workstation for the Final Year Project using Unity and a Meta Quest 2; implemented spatialised C# playback controls, haptic feedback, and a vertical timeline interface via the Meta XR SDK to explore intuitive 3D workflows beyond traditional 2D DAWs.

St Brendan's Sixth Form College | Bristol, UK *September 2019 - July 2021*

- *BTEC (Level 3) Music Performing*
- *A-Level Music Technology*
- *BTEC (Level 3) IT*

Relevant Experience

Sound Designer | Global Game Jam 2025; UWE Bristol, UK *January 2025 - February 2025*

- Built and integrated an adaptive game-audio system in Unity (C#) with FMOD, implementing event-driven interactive music and real-time DSP behaviours that react to gameplay.
- Composed, edited, and mixed an original soundtrack for BobaQuarium, working closely with the team to a fixed deadline and refining implementation based on playtests.
- Applied audio programming and sound design techniques (synthesis, effects chains, editing/post), with a focus on real-time playback control, parameter automation, and clean integration workflows.

Additional Experience

Bar Staff | Lansdown Cricket Club, Bath, UK *March 2026 - Present*

- Enhanced member experience by building rapport with approximately 50 club members and visitors daily, delivering personalised customer service in a community-focused environment.
- Maintained efficient front-of-house operations by balancing high-volume drink service, stock replenishment, cleanliness standards, and table service responsibilities.

Volunteer | Social Committee Member | CircleUp, UK *January 2026 - Present*

- Mascot for the local Bath community for CircleUp, creating the high-energy, inclusive environments necessary to convert digital subscribers into active, real-world communities.
- Co-host Friday night pub socials, interact in member chats, and actively break the ice for new or solo attendees to ensure immediate comfort and safety.

Volunteer | Audio Developer Conference; Bristol, UK *November 2024 & November 2025*

- Supported hybrid operations at the Audio Developer Conference, troubleshooting AV issues and livestream pipeline connectivity across Discord, Zoom, and Gather Town.
- Networked with audio programmers, speakers, and exhibitors to learn current tools and production workflows.

Intern | UK Government Digital Service; Whitechapel Building, UK *June 2025 - August* 2025

Cabin/Camp Counsellor, Guitar Coach & Assistant Theatre Sound Engineer |

Camp America, USA *June 2024 - August 2024*

Society Founder & Committee Member | Society of Musicians; University of the West of England, UK *October 2022 - August 2025*

- Founded the university's music society, bringing together an engaged core community through regular organised live music activities and consistent member engagement.
- Led collaborative jam sessions as guitarist and bassist, fostering an inclusive creative environment and strengthening peer collaboration skills, utilising Discord for event programming.
